PORT DG STORAGE- Compliant with legislation AS1940-2004

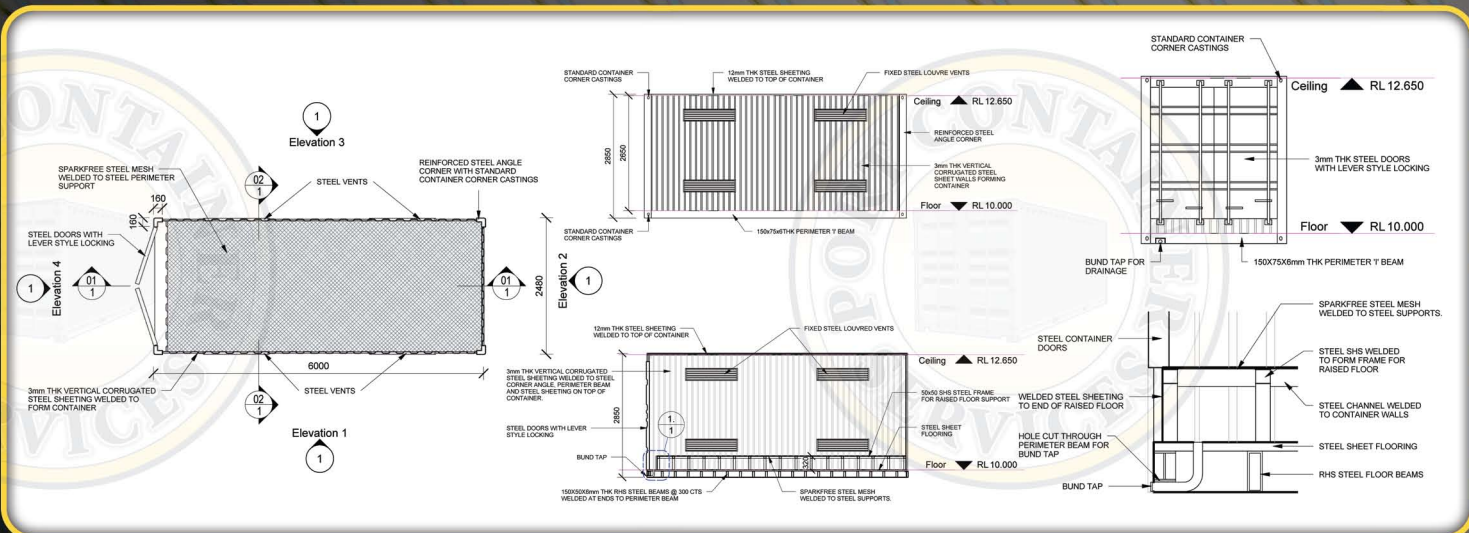

PORT Hazardous (Dangerous) Storage containers are the perfect storage solution for chemicals, thinners, oils, diesel, class 3 flammables and (or) any potential dangerous substance.

PORT DG STORAGE containers are outfitted with an internal safety door handle, ventilation, bunded floor section (to allow for environmentally friendly waste disposal) and a lockable stainless steel valve that unlike our competitor's is fitted under the rear sill, ensuring the safest and easy method of waste disposal.

PORT DG containers not only provide solutions for Hazardous (Dangerous) goods, they can also provide a vital storage space for non-hazardous (Dangerous) materials where there is a possible risk associated with spillage.

PORT DG STORAGE (6m) has a storage capacity of approximately 10,000L, and has a bund capacity of approximately 2,540L.

Length	Width	Height	Length	Width	Height	Tare Weight	Capacity
6.06m	2.44m	2.59m	5.49m	2.34m	2.36m	2,530kg	10,000L
