

# STANDARD CONTAINER RANGE

## Brand New & Used High Cube Shipping Containers

Our High Cube containers come in 20' and 40' sizes and all have structures made from solid steel with double doors as standard. A high cube container is an extra foot taller in height than a standard container which allows you to store bulkier goods. Our standard doors will open a full 270°, and have solid timber flooring inside.

We can customise each shipping container to include accessories such as additional doors, air conditioning, shelves, windows and much more. The shipping container dimensions will vary, so you will need to work out the volume required, which our advisors would be more than happy to assist you with.

- Solid steel structure
- Vermin-proof
- Wind resistant and water-tight
- Timber flooring
- Lockable
- Double container doors,
- 270 degree opening
- Reconditioned containers are available in a range of Colours

### Container Specifications
