

# MODIFIED CONTAINER RANGE

## Confined Space Training Containers

The Training Container was designed by Shipping Containers Australia to help train employees in the mining and emergency sectors.

The shipping container can be fitted with numerous wall partitions and entry points, and includes a rooftop platform with entry hatch for rooftop access. The exterior of the shipping container can be painted any colour with all safety railing painted yellow. The interior is painted grey or jet black to simulate a mine shaft or confined space with low visibility.

The side wall can also be fitted with a smoke machine nipple to release smoke if used in a fire safety exercise. For more information give us a call, our advisors would be more than happy to assist you with your design.

- On site staff training - simulate search & rescue scenarios
- 20' and 40' Safety Training Units available
- Off the plan or built to your specifications
- Strong and robust
- Ready for immediate use on delivery

Example of a Training Container

### Container Specifications

#### General Purpose Units

Specifications	20' GP Container	40' GP Container
Inside Cubic Capacity	33.2 m3	67 m3
